

BLACK EDITION SPA

ENJOY THE LUXURY OF YOUR OWN SPA ALL YEAR ROUND

NEPTUN
spabad och vardagsglädje

Welcome to us at Neptun, your reliable Swedish supplier of outdoor and indoor spas since 1991!

Considering buying a spa? Now you have the correct material in your hand to make the correct choice!

- Black Edition by Neptun -

Black Edition is the spa of the future with a lot of equipment included which is extras from our competitors.

The details are specially designed for you with high demands when it comes to quality and reliability.

In our Black Edition series, we include for example separate circulation pump, stainless steel jets, LED lights above the waterline (border lights) and titanium heater as standard without extra charge.

Our unique Triple Thermal Shield "TTS" will give you a very energy efficient spa! More info on page 28.

We only use Aristech / Lucite sanitary acrylic from USA.

Svenska Neptuns long experience during decades is proven in the design and equipment in the Black edition series which makes it one of the best valued spas in the industry.

No matter which model you will choose from our Black Edition series you will get a lot of spa for your investment.

To soak in a spa during all seasons will bring comfort and a feeling of wellbeing for body and soul.

To have access to massage in warm water 24/7 365 days a year is a new lifestyle which is unbeatable! The new gathering place for your family and a place for relief in life!
A good investment for the future.

At last: Now its time to choose your favorite model and enjoy life!
We deliver and you enjoy, to the best prices and the highest quality.

The family's best investment in well-being!

A spa of your own right at your home?

Tips & Advice

Positioning and foundation:

A wood deck, a poured slab or a paved patio? Whatever the foundation, you are required to consider a total weight of 500 kg/m²

Running expenses:

Approx. Euro 30 per month, based on continuous operation with 38°C hot water all year round and bathing, on average, 2 to 3 times a week.

Installation:

Our spa requires multi-phase connection. The spa is filled with water with a hose. To empty the spa of water, use the integrated drain valve or a submersible pump – the simplest and fastest solution.

Think of:

You are welcome to compare the net tare weight in kg of the different models. A heavier spa usually reveals a solid and strong design as well as good insulation.

Reasons to by a Black Edition by Neptun?

Whatever model you select from the Black Edition series, you always get something out of the ordinary.

You get equipment, comfort, design, quality, function and operational reliability that can be offered by very few other models.

We raise our hats and congratulate you for a good choice – the most spa for your money! Black Edition!

ENERGY EFFICIENT INSULATION

NEPTUNS UNIQUE "TTS" TRIPLE THERMAL SHIELD

ENERGY EFFICIENT INSULATION

Svenska Neptun unique reflecting insulation "TTS" where heat and cold bounces back. Reflecting insulation developed by Nasa to insulate the space shuttles and the suits for the astronauts at the extreme temperature variations you face in space!

Energy efficiency is the most important part for all customers.

Svenska Neptun has been taking every step to make our spas as energy efficient as possible and we are among the most efficient spas for outdoor use on the market!

Our Triple Thermal Shield is not only the most efficient insulation but furthermore it gives us space for more components and good access for service and maintenance when needed. With the latest thermal technic Svenska Neptun delivers the ultimate within energy efficiency and keeps the running cost significantly lower!

Standard equipment in all models

Knobs

New Black Edition design of both the air and water knobs. The Utö and Dunö models also features LED lighting in all knobs.
